Software Development Engineer with hands-on experience building scalable backend services, Android applications, and production-ready software systems using Java, Python, Spring Boot, and REST APIs. Experienced in backend architecture, real-time communication, data synchronization, database design, cloud deployments, and performance optimization. Strong foundation in object-oriented programming, data structures, system design, debugging, and Agile software development.

## SKILLS

---

**Programming and Web :** Java, Python, Kotlin, JavaScript, HTML5, CSS3, React, Next.js

**Backend:** Spring Boot, Hibernate, REST APIs, Microservices, WebSockets, JWT, Maven, Gradle

**Databases:** PostgreSQL, MySQL, MongoDB, ObjectBox

**Cloud & DevOps:** AWS, Docker, Kubernetes, Linux, CI/CD

**Engineering:** OOP, Design Patterns, DSA, System Design, API Design, Debugging, Performance Optimization, Testing

**Android:** Android SDK, MVVM, MVI, Jetpack, Google Ink API, ProtoBuf

**Tools:** Git, GitHub, Bitbucket, Jira

## EXPERIENCE

---

### Software Development Engineer

SlickMachine | Bengaluru, India

February 2026 - Present

- Designed and maintained scalable backend services using Java, Spring Boot, and REST APIs for authentication, data synchronization, document management, search, and real-time collaboration across Android and web applications.
- Developed secure backend systems using JWT authentication and AES-256-GCM encryption, ensuring reliable API security and scalable architecture.
- Engineered large-scale data synchronization, batch processing, pagination, multimedia processing, and WebSocket-based real-time communication, improving reliability, performance, and scalability.
- Designed and maintained AWS infrastructure using EC2, VPC, IAM, S3, RDS, ALB, Auto Scaling, ECR, and CloudWatch for staging and production environments.
- Developed Android features using MVVM/MVI, integrating Google Ink API (Ink Compose) and ProtoBuf for digital ink capture, serialization, storage, and cross-device synchronization; containerized services with Docker and troubleshoot production issues using Git, Bitbucket, and Jira

### Software Development Engineer Intern

SlickMachine Hashmint | Bengaluru, India

October 2025 - January 2026

- Contributed to Spring Boot backend modules and REST APIs for authentication, data synchronization, document management, and database operations, gaining hands-on experience in backend architecture, API integration, and scalable application development.
- Worked on Android features using MVVM and backend API integration, gaining practical experience in debugging, testing, and performance optimization while working with PostgreSQL, Docker, Git, Bitbucket, and Jira in an Agile environment.

## PROJECTS

---

### 1. AirVision | FastAPI, React, PostgreSQL, PostGIS, SQLAlchemy

- Built a full-stack air quality forecasting platform integrating CPCB ground data and Sentinel-5P satellite imagery, with FastAPI REST APIs, PostgreSQL/PostGIS, SQLAlchemy, automated data ingestion, scheduled synchronization, and geospatial processing.

### 2. PlateShare | Python, Flask, MySQL, JavaScript

- Built a full-stack food donation platform using Python, Flask, MySQL, and REST APIs, implementing role-based authentication, CRUD workflows, food listing management, analytics dashboards, password hashing, and responsive interfaces.

### 3. PoetByte | Next.js, MongoDB, NextAuth.js, Tailwind CSS

- Built and deployed a full-stack poetry publishing platform using Next.js, MongoDB, NextAuth.js, and Tailwind CSS, implementing secure authentication, REST APIs, CRUD-based poem management, protected workflows, responsive UI, and dark/light themes

## EDUCATION

---

Bangalore Institute of Technology

Master of Computer Applications (MCA)

11/2024 – 06/2026

CGPA: **9.16/10**
